

Professional sourcing service in china

LeWorks offers sourcing services, helping your company find and buy quality parts and products from China.

Our staff speak Chinese and English, and our managers are from Sweden.

In addition to sourcing we offer a "cofactory" service for companies that want their own factory without having to manage it. Our factory is designed for assembly and is located in Changzhou, near Shanghai.

Sourcing you can trust

As a Swedish company we come from a tradition of quality and transparency. Our professional staff works only with trusted suppliers. If we don't already have a relation to a supplier, we will do a factory visit and properly scrutinize the supplier.

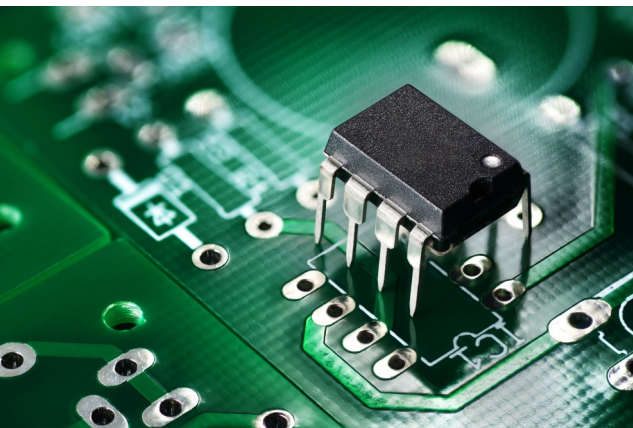

Custom sourcing

We will find whatever part or product you need. Our sourcing agents work directly with the factory, without any middlemen, ensuring quality and reliability.

Plastic injection molding

We work with a quality supplier for plastic injection manufacturing. We can also offer fast prototyping and mechanical engineering services.

PCB/PCBA

Our PCB/PCBA supplier has a swift turnaround and delivers high-quality and affordable products. We can also offer PCB design and firmware programming.

Packaging & Printing

We work with a print factory that can make various types of packaging, cartons and also print instruction manuals.

Export & Shipping

We handle export, shipping and warehousing, if needed. Surface, air, railway or road – we'll help you find the best solution for your specific needs.

The cofactory service

Our main offer is a “cofactory” — a service for companies that want their own assembly factory without having to manage it.

At LeWorks we handle all factory management tasks, leaving you in control of the actual manufacturing work.

With the greater control you can more easily control the quality.

Our first factory is built for assembly manufacturing, and is located in Changzhou, near Shanghai. As a customer, you get your own sealed off space, that we furnish and equip to match your specific needs.

About LeWorks

LeWorks is a Swedish factory management company, based in Changzhou, China – a city next to Shanghai.

We started the company in response to the growing frustration that many companies experienced with unreliable sourcing and manufacturing, during Covid-19, when factory visits weren't possible.
